

# LEANFLASH DYNLOT

## KANBAN batch box

REGISTERED  
MODEL

The **KANBAN Batch issuer** | LEANFLASH DYNLOT system is a major innovation in the field of KANBAN management. It allows operators to visually manage their production “batchwise” by observing visual alert thresholds.

- The LEANFLASH DYNLOT, with a width of 900 mm/*35.43 Inch* or 1800 mm/*70.86 Inch* and magnetic attachment, is coupled with a communication board.
- The DYNLOT can hold several BOXCARD, which are then moved manually from left to right while observing defined thresholds.
- These threshold definitions take the form of coloured magnetic strips (green, yellow, red).
- Use of colours or universal Kanban cards.
- *Provided with 3 magnetic tapes to cut by yourself (green, yellow, red)*

### Application

Display, Documentation, Suppliers, Management, Kanban, Logistics, Planning

CODE	DESIGNATION	LEAD TIME	PACKING
130345	L 900 mm magnetic	3 days	Per unit
130346	L 1800 mm magnetic	3 days	Per unit

# BOXCART

## KANBAN batch launcher

REGISTERED  
MODEL

The **KANBAN Batch issuer** | LEANFLASH BOXCARD which slides into the DYNLOT rail makes it possible to create “batches” with maximum capacity of 36 cards. It also has magnetic fixing to be used with a workstation or communications table. The built-in card support receives the “batch” identification card for clear and rapid identification.

- Use of colours or universal Kanban card
