ROLL OF INDUSTRIAL MARKING TAPE

How do you keep a well-organised workshop in accordance with the principles of 5S?

SESA SYSTEMS' floor marking, safety and signage range is designed to help you to mark out, organise and identify your work spaces. Floor marking allows you to mark off areas and spaces within your warehouses, particularly to avoid obstructing them. This range also allows you to put up signage for safety instructions and restrictions in order to improve safety and working conditions for operators and sustain the 5S approach within your organisation
