

# Warehouse protections

## ● Barrier post

Cost-effective **barrier post** to easily prohibit access to a zone, mark out access or guide people in queues. Ideal to secure or mark out access paths, both inside and outside. It offers a rapid and economical solution, as it can be installed quickly and easily and can be adapted to all situations.

- Post height: 910 mm/**35.82 Inch**
- Diameter 63 mm/**2.48 Inch**
- Weighted base: Ø 320 mm/**12.59 Inch**
- Barrier length 2000 mm/**78.74 Inch**, mounted on a roller mechanism built into the post
- 1 main post with barrier + 3 connecting posts

160110	Red/white strap	5 days	Per unit

160112	A4 Vertical/Horizontal and rotating panel for post	5 days	Per unit

## ● PVC posts

**PVC posts** with weighted base to mark out and secure working zones or hazardous zones.

- Chain: 2 or 10 metre length
- Colour: White/red
- With space for information frame (ref. 160212)

160120	Kit of 2 PVC posts with 2 Meter red/white chain	5 days	Per unit
160121	Kit of 6 PVC posts with 10 Meter red/white chain	5 days	Per unit
160112	A4 Vertical/Horizontal and rotating panel for post	5 days	Per unit

Collisions between forklift trucks and shelves are the most common workplace accidents in warehouses. To significantly reduce the risks of subsequent damage, the **post protection** is a clever shield system for shelves to avoid racks falling in the event of a collision. Thanks to its universal format, the protection adjusts to several different shelf sizes, so you do not need to worry about precise dimensions. This protection model absorbs energy and offers incomparable flexibility. After a collision, the shelving protection will return back to its original position and its external appearance and properties, whilst keeping your shelving intact.

- Colour: yellow
- For post 75>110 mm/**2.95>4.33 Inch**
- H 600 mm/**23.62 Inch**

160410	Set of 6 protections Ø 40 mm / 1.57 Inch	On stock	In batch
