

PEDESTRIAN BARRIER

NEW

The **pedestrian barrier** allows workers and vehicles to occupy the same site safely, as well as sites where forklifts and pallet trucks regularly circulate... This strong pedestrian barrier is highly impact resistant. It is able to absorb impacts caused by heavy vehicles and guarantee pedestrian safety. The modular pedestrian barrier marks out each zone and can be supplemented at a later date.

- Post H 1100 mm/43.30 Inch
- Fastening with 2 attachments for fastening to a concrete floor

Application

Workshop, Warehouse, Logistics, Signaling, Storage

INDICATION MARKING SAFETY

CODE	DESIGNATION	LEAD TIME	PACKING
160210	End post	On stock	Per unit
160211	Intermediate post	On stock	Per unit
160212	Set of 2 point-to-point rails, 1000 mm / 39.37 Inch yellow	On stock	In batch
160213	Set of 2 point-to-point rails, 1500 mm / 59.05 Inch yellow	On stock	In batch
160215	Set of 2 point-to-point rails, 2000 mm / 78.74 Inch yellow	On stock	In batch
160216	Set of 2 x 90° corner rails yellow	On stock	In batch

CIRCULATION BARRIER

NEW

The **circulation barrier** is very close to the ground. The lower tube prevents pallets or goods from sliding under the barrier, whilst the double pedestrian barrier reinforces pedestrian safety. As the centre of gravity is lower, this barrier is more resistant. It is able to absorb impacts caused by heavy vehicles and guarantee pedestrian safety. All barriers are designed to absorb impacts and return to their original shape and appearance after a collision without losing their impact absorption capacity. The modular pedestrian barrier marks out each zone and can be supplemented at a later date.
