INDICATION MARKING SAFETY

● Anti-collision post

The **anti-collision post** \varnothing 125 mm offers protection against minor vehicle impacts. When hit, the material bends under the effect of the impact and then returns to its original shape. Thanks to its flexible properties, they will practically never need to be repaired.

- Colour: yellow
- Dimensions: H 750 mm/29.52 Inch
- 4 attachments to fasten to a concrete floor

160300	H 750 x \varnothing 125 mm / 29.52 x 4.92 Inch	On stock	Per unit

● Anti-collision post

The **anti-collision post** \varnothing 200 mm is intended for areas with frequent collisions. Due to its large diameter, this post is able to absorb frequent impacts. Thanks to the flexibility of their plastic components, these posts fold in the event of a collision, and then return to their original shape. Repairs after impacts are therefore limited to what is strictly required.

- Colour: yellow
- Dimensions: H 750 or 1000 mm/29.52 or 39.37 Inch
- 4 attachments to fasten to a concrete floor

160310	H 750 x \varnothing 200 mm / 29.52 x 7.87 Inch	On stock	Per unit
160311	H 1000 x \varnothing 200 mm / 39.37 x 7.87 Inch	On stock	Per unit

● Shelving protection

Shelving protection is ideal to protect pallet racks from collisions. Located at the ends, the protection avoids your shelves from collapsing in the event of a collision with forklift trucks. They stand out due to the fact that the dents disappear automatically after the collision. Thanks to its flexible properties, the shelving protection material returns to its original shape and its original appearance after an impact. No replacement or repair is required after a collision.

- Colour: yellow
- Dimensions: H 550 mm/21.65 Inch
- 4 attachments to fasten to a concrete floor
