

E-STATION

Touch tablet

INDUSTRY 4.0

Application

- Administration
- Display
- Communication
- Industry 4.0
- Lean Management
- Digital visual management

The touchscreen tablet |E-STATION allows you to get closer to production and simplify the processes involved.

E-STATION is an interactive tablet available in 10.1 Inch format, version for use on the go or combined with a production workstation.

The E-STATION tablet is combined with the workstation at production plants to give direct access to all information needed by operators to do their work on their machine.

E-STATION allows you to enter and display in real time on SESA HUB all production and quality results, either daily or on an hour-by-hour activity chart across three teams.

Various pieces of information can be entered (Product quantity, maintenance, machine breakdowns etc.).

The aim is to work on a «zero paper» basis on the workstation with a screen that allows you to bring up all useful information via SESA HUB.

For more ergonomic use, various accessories are available such as:

- Protective case with shoulder strap, swivel wall bracket.
