MACHINE MAINTENANCE

Use with SESA HUB

At their workstation, operators can call up various documents via SESA HUB such as:

- Work report, safety report to begin work
- Procedure, instructions, room layout
- Knowledge database, standard operating mode
- Production order to be validated to begin work (point by point to be validated)
- Miscellaneous information (Product quantity, maintenance, machine breakdowns etc.)
- Monitoring of production on connected ERP

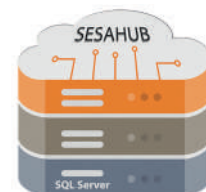

Information can also be entered and viewed on a PC or SMARTPHONE.
