

# E-LEANBOARD

Dynamic and connected digital display

INDUSTRY 4.0

## Application

- Administration
- Display
- Communication
- Industry 4.0
- Lean Management
- Digital visual management
- Dashboard

The **connected digital screen** |E-LEANBOARD is dedicated to the management of several types of digital animation in the INDUSTRY 4.0 spirit with great ease in Displaying, Creating, Planning.

A team leader runs his meeting by distributing PDF/JPEG documents from his work station by pushing the content from his PC onto the E-LEANBOARD screen using the SESA HUB.

A manager connects to his account in order to present the indicators in a E.Obeya room (Lean management).

The E-LEANBOARD screen can be connected for local management via a USB key, as Screen Mirroring (screen copy of a Smartphone or tablet), as centralised management via a Wifiserver in the network (15 metres) or with a wire (HDMI cable). This is a Web solution for remotely controlling your E-LEANBOARD screens and your content through an Ethernet network.

The originality of the E-LEANBOARD is to incorporate a message management application that is very simple to use, intuitive and visual.

- Several models (templates) are offered for the key entry of the values into an existing EXCEL table, the automatic creation of PDF indicators and transfer to E-LEANBOARD.

- Several possibilities are proposed:

1/QCDM visual indicators (hourly, daily, weekly, monthly)

2/ LEAN projects in progress 3/ Life of the company

4/ Our customers

5/ Daily events (date, weather, RSS feed)
