

PRODUCTION INDICATORS DISTRIBUTED IN THE MEETING ROOM

PRODUCTION INDICATORS DISTRIBUTED IN THE MEETING ROOM

DISTRIBUTION OF INDICATORS AND WEEKLY RESULTS IN THE VICINITY OF THE PRODUCTION AREAS

DISTRIBUTION OF DAILY RESULTS IN THE VICINITY OF THE WORKSTATION

## Technical advantages

**E-LEANBOARD, a digital screen connected to the web app: SESA HUB** (see page 188 and 189).

Several remote visual collaboration solutions are perfectly suited to the needs of companies.

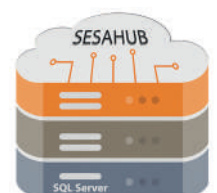

All SESA SYSTEMS screens are designed to be used instantly. They include a large number of features and intuitive applications. For example, start entering production values on E-STATION and finish on a PC. With SESA HUB, send out your presentations on an E-LEANBOARD, E-MEETING or E-ACTIVEBOARD. SESA HUB allows you to add to or view all important documents between all screens.

Intuitive and familiar interface: SESA HUB software is easy to use, allowing for trouble-free integration into your company.

E-LEANBOARD can be connected locally by WiFi within 15 metres, wired connection, via a USB key or by Smart View.

This allows managers to connect directly to present their information at a meeting.
