Characteristics

E-MEETING, «it's like a giant tablet»: the touchscreen lets you control all of a computer's applications and content directly from the screen. You open an application, type in a website address from the display panel without going back to your PC. An optional central mini unit can be included directly in E-MEETING.

With E-MEETING, «you can write anywhere»: Interactive, it lets you interact with your computer's content by annotating diagrams, highlighting text etc.

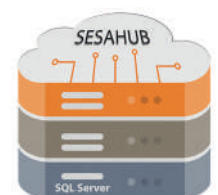

E-MEETING «it's mainly Notebook» SESA HUB lets you capture your ideas on an interactive and infinite page. At the end of the meeting, all content can be saved in the format of your choice or sent in one click. Minutes of the meeting are taken and sent out in real time.

This is a remote visual collaboration solution perfectly suited to the needs of companies.

E-MEETING can be connected to the local Ethernet network via a USB key or using Smart View. This allows managers to connect directly to present their information at a meeting.

In short, E-MEETING lets you stay organised at your meetings and keep track of everything that has been said. You can be more creative and communicate better.
