RUN A MEETING

MANAGE A PROJECT

Technical advantages

E-ACTIVBOARD, «it's a giant whiteboard»: the interactive touchscreen lets you control all of a computer's applications and content directly on the board. You open an application, type in a website address from the display panel without going back to your PC. **With E-ACTIVBOARD, «you can write anywhere»:** Interactive, it lets you interact with the connected computer's content. It's very easy to use the stylus or a finger to interact by annotating diagrams, highlighting or amending text etc. At the end of the meeting, all content can be saved in the format of your choice or sent in one click. Minutes of the meeting are taken and sent out in real time.

This is a remote visual collaboration solution perfectly suited to the needs of companies.

In short, E-ACTIVBOARD lets you stay organised at your meetings and keep track of everything that has been said. You can be more creative and communicate better.

Integrate and enhance obeya with digital virtual management

Obeya, which means «big room» in Japanese, is a Lean visual management practice. It is a place for intensive and ritualised collaboration. Information is available and managed collectively via short and periodic meetings. It's an easy and effective tool for responding to performance challenges.

Obeya is implemented to monitor and manage projects: E-ACTIVBOARD presents information about the background and issues involved.

It's a management tool that helps you to quickly identify and resolve problems. To bring it to life, the project team makes a ritual of its use: weekly or even daily meetings, short problem resolution loops, ongoing improvement etc. This tool offers a tailored response to reconnect team members, in order to learn together and act together.

Obeya is an amazing tool that can accentuate collaboration between team members who are usually geographically spread out and let employees be autonomous.
