

VISUAL MANAGEMENT TABLE ACCORDING TO YOUR PERSONAL NEEDS

Silk-screen printing

Give your communications more scope by customizing your display boards without constraint, so they observe the standards defined for your projects. All formats are possible (Excel, PDF, jpeg images, etc.).

Dimensions to be stated on your model or diagram. Usable dimensions of the bracket to be stated.

For a silkscreen print job, certain all-important information must be provided. The print layout must be defined in a computer file, showing full dimensions of all the columns, boxes, and texts. The default font we use is Helvetica Medium (others available on request). The normal colours are the SESA systems house colours but custom colours can also be used.

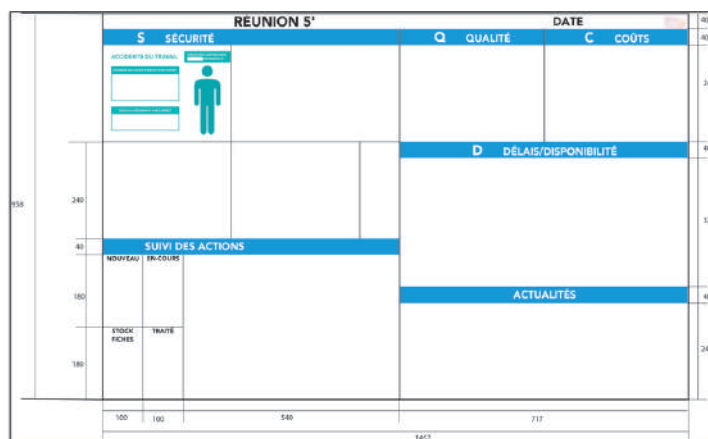

Other details we require for the silkscreen print: Usable dimensions (height, width) of the backing material.

Acceptable formats: high definition AI and EPS or PDF, JPEG, XLS, DOC

With your order: PRINT PROOF ("BAT") verified and signed by you.

THE STEPS

1. Sending of layout

2. Layout fixing

The advantages

Examples of customer achievements

100%
CUSTOM-MADE

Application

- Visual management
- Group Projects
