

EDITORIAL

Thirty years ago, in 1990, SESA SYSTEMS founder Jean-Paul Lerailler revolutionised how operators work with his daring products, including the world's first Quality Point products and visual management, followed by the SESA SYSTEMS concept dedicated to Lean Manufacturing tools.

His original design Aluminium products are now internationally recognised by 8 patents and 240 registered designs. World market leader in Lean Enterprise, SESA SYSTEMS designs, develops and supplies its products all over the world to the largest industrial groups.

In 2020, in addition to essential ranges for organising production quality, you can discover the Industry 4.0, INOX and ESD programme.

Pioneer and innovator are the key words at SESA SYSTEMS. More than 300 new products are on offer this year, with a strong emphasis on the development of innovative solutions in terms of user-friendliness and centred around Industry 4.0, including a new web application for Digital Visual Management.

The entire team at SESA SYSTEMS is on hand to guide you and advise you on your company's digital transformation.
