

REDUCE WORKLOAD WITH SIT-STAND WORKSTATIONS

A STATEMENT

SESA SYSTEMS has innovated once again and expanded its range of workstations and height-adjustable trolley units.

The aim?

To improve operators' **working conditions and productivity** by allowing them to adapt the height of their workstation to the tasks being performed. They are therefore able to change to sitting, standing or sit-stand.

The new sit-stand workstations for workshops allow for the right working height and appropriate availability of tools and components thanks to a number of compatible accessories.

THE ADVANTAGES OF OUR PRODUCTS

- Fixed or castor mounted electrically adjustable workstations adapting to physical characteristics
- Workstations adaptable to the task to be performed: rapid prehension of tools without effort
- Easier handling (adapted and optimised motion and transportation): prevents against risks of MSD
- An evolutive and flexible universal workstation

BENEFITS

- Physical improvement of working conditions;
- Significant reduction in wastage of energy, time, non-quality, efficiency, fatigue;
- Better compliance with labour and safety legislation;
- Satisfaction and pride in work and better image with clients/visitors.
