The electric and ergonomic industrial workstation

WORKSHOP FURNITURE

Application

- Assembling
- Workshop
- Packaging
- Electric
- Ergonomic
- Industry
- Lean Manufacturing
- Production
- Quality

The QUALIPOST 3200 ERGO **height-adjustable ergonomic workstation** is designed to provide better working conditions in workshops. Multi-functional, flexible and customisable, this electric workstation quickly changes height and allows the operator to choose between several working positions: sitting, standing or sit-stand position. Adjusting as such his work surface to his liking via quick and easy settings can provide many advantages for the company and the users. This sit-stand workstation which has endless configurations makes tools and production parts available in an optimum manner, which substantially boosts productivity in the short term. For the operator, tasks are not as tedious, his daily performance thus improves. For the company, in the long term, there is a reduction in absenteeism linked to musculoskeletal disorders.
